

### REMARKS

Prior to examination, Applicant respectfully requests entrance of the following amendments. It is believed that the foregoing amendments and additions add no new matter to the present application.

Claims 1-3 and 5-20 remain pending in the present application. Upon entry of this Preliminary Amendment, independent claim 1 has been amended to include the limitation “where the bit burst analysis information comprises a plurality of bit burst counters, each of the bit burst counters counting a number of bit bursts that was placed into one of a plurality of burst categories”. Similarly, independent claim 5 has been amended to include the limitation “where the bit burst analysis view comprises a plurality of bit burst counters, each of the bit burst counters counting a number of bit bursts that was placed into one of a plurality of burst categories.” Finally, independent claims 8 and 11 have been amended to include the limitation “where the bit burst analysis parameter view comprises a plurality of bit burst counters, each of the bit burst counters counting a number of bit bursts that was placed into one of a plurality of burst categories.”

New claims 14-17 depend from independent claim 1, and add further limitations to the existing element “bit burst analysis, network latency, data delivery success and frame size distribution information.” New claim 18 depends from independent claim 1, and adds a further limitation to the existing element “display means.” Similarly, new claims 19 and 20, depending from independent claims 8 and 11 respectively, add further limitations related to the display step.

In view of the foregoing amendments, reconsideration and allowance of the present application and claims are respectfully requested. If the Examiner has any questions or comments regarding Applicants' response, the Examiner is encouraged to telephone Applicants' undersigned counsel.

Respectfully submitted,

**THOMAS, KAYDEN, HORSTEMEYER  
& RISLEY, L.L.P.**
